SKILLS Go, Kubernetes, OpenShift, Operators, AWS, Azure, GCP, IAM, Python, Terraform, CI/CD, Git, Linux, Prometheus

EXPERIENCE

CTO & Co-founder December 2025 - Present
Axon Data
- Architected and built the application platform from scratch, defining service boundaries, database architecture, REST API, Go/Python microservices, and infrastructure as code.
- Led a two-person engineering team, owning technical direction and the bulk of implementation while mentoring the frontend engineer.
- Designed and implemented the company's SOC 2 control environment, achieving Type II attestation.

Principal Site Reliability Engineer July 2018 - December 2025
Red Hat
Promoted: Associate SRE → SRE → Senior SRE → Principal SRE
- Designed and implemented least-privilege hardening of the AWS IAM managed policy underpinning ROSA HCP; drove approval with AWS and served as lead technical owner for cross-team proposals.
- Built Kubernetes operators in Go that automated a large managed-OpenShift fleet, including AWS account provisioning, federated IAM roles, and cluster ingress reconciliation.
- Operated 100s of OpenShift clusters on 24/7 on-call, resolving critical outages and leading post-mortems that drove permanent fixes.
- Grew from leading 6–7 SREs to overseeing multiple functional leads, setting quarterly strategy and shipping initiatives like ARM node support for ROSA HCP ahead of schedule.

Infrastructure Intern June 2017 - September 2017
CoreOS
- Built an SNMP monitoring system on Kubernetes via Helm and stood up a bare-metal Tectonic cluster from scratch.

Student System Administrator January 2015 - June 2017
Open Source Lab
- Provided Linux-based hosting and other solutions to over 100 open source projects.

EDUCATION

Bachelor of Science, Computer Science (focus: Mathematics & Music)
Bachelor of Science, Music (focus: Vocal Performance)
Oregon State University

AWS Certified SysOps Associate - April 2021
